## Bureau of Environmental Health Services

### Food Safety, Onsite Wastewater, and Rabies Prevention

## Food Safety

- Conduct surveillance and response for foodborne illness outbreaks
- Inspect and permit milk, cheese, frozen dessert, bottled beverage, and manufactured ice plants as well as retail food establishments and dairies
- Provide guidance statewide for uniformity and consistency in applying regulations
- Provide training on food safety and how to reduce the occurrence of food-borne illness risk factors to industry

## Septic Systems

- Conduct field evaluations to determine site suitability for a septic system
- Issue Permits to Construct once a site has been approved for a septic system
- Conduct final inspections of systems to ensure proper installation
- Provide technical assistance to the public
- Investigate complaints related to septic system malfunctions

## Rabies Prevention

- Conduct investigations into potential rabies exposures to people, pets (cats, dogs, and ferrets), and livestock
- Work with home owners and partnering agencies to assist in the capture, transport, and preparation of potential rabid animals
- Ensure our communities are aware of confirmed rabid animals found in their area
- Promote yearly, low-cost rabies vaccination clinics each spring
- To report an animal bite or incident on nights, weekends, or holidays, call 1-888-847-0902 (option 2)
